We report the case of a 48-year-old female with chronic atopic eczema who responded successfully to Dr Michaels® (Eczitinex® and Itchinex®) product family. The patient had a 41-year history of atopic eczema and presented with erythematous, excoriated lesions with telangiectasia and scattered purpura (bruising) covering 90% of her body surface area. The patient also regularly suffered blepharitis with red, itchy, watery eyes. The patient was treated with Dr Michaels® (Eczitinex® and Itchinex®) ointment and herbal supplements and presented total resolution of the atopic eczema and underlying inflammation within 6 weeks. This case also suggests that Dr Michaels® (Eczitinex® and Itchinex®) product family is safe and effective, even in cortisone acquired sensitive skin.
